<b>Comments</b>	<input type="text" value="Gavray Meadows is currently a wonderful place for local people to experience nature and escape the stresses of modern life helping to improve well-being and mental health. Many of the plants and animals found there are not present in neighbouring areas. We should be preserving this for future generations and not allowing development. Gavray Meadows should be protected as a nature reserve and seen as a great asset for Bicester. Building on the area will have a detrimental effect resulting in habitat loss. I also have concerns over the potential flooding that will result if the area is built on. In the winter it is very wet. Where will all the water go if the land is built on? It will surely result in flooding elsewhere."/>
