Screening Opinion

- | | | |
|----|---|---------------------------------|
| 3. | Is there a Secretary of State Screening Direction or any pre-application screening opinion for the development? | <input type="text" value="No"/> |
| 4. | If the answer to 3 is no, then for any schedule 2 development describe below why the characteristics of the development, the environmental sensitivity of the location and the characteristics of the potential impact does or does not mean that an ES is necessary. | |

An EIA is not necessary as:

The proposed development is a general purpose agricultural barn for the storage of straw, hay and silage, and farm machinery, alongside providing overwinter accommodation for weaned calves. The footprint would exceed 500m², although I do not consider it to constitute Schedule 2 Category 1c development as an intensive livestock installation given the seasonal use of the accommodation and the amount of floorspace afforded to general storage.

The proposal is therefore considered not to constitute EIA development and does not require the submission of an Environmental Statement.

Is an E.I.A. needed?

No
