

# Comment for planning application 20/03619/F

<b>Application Number</b>	<input type="text" value="20/03619/F"/>
<b>Location</b>	<input type="text" value="Heyford Park Camp Road Upper Heyford OX25 5HD"/>
<b>Proposal</b>	<input type="text" value="Construction of attenuation basin including associated infrastructure and landscaping"/>
<b>Case Officer</b>	<input type="text" value="Andrew Lewis"/>
<b>Organisation Name</b>	<input type="text" value="Gareth Hopkins"/>
<b>Address</b>	<input type="text" value="Arosfa,Greenway,Caulcott,Bicester,OX25 4NF"/>
<b>Type of Comment</b>	<input type="text" value="Objection"/>
<b>Type</b>	<input type="text" value="neighbour"/>
<b>Comments</b>	<input type="text" value="It is abundantly clear that inadequate measures have been installed for the treatment of surface water and ground water for the development of the whole of the Heyford Park site. South of Heyford Park, and at a lower level amsl, is the hamlet of Caulcott through which flows Gallos Brook. Gallos Brook has its origin in Heyford Park from which it flows approximately from north to south emerging in Caulcott on the western side of South Street opposite the Horse and Groom PH. Since the development of Heyford Park, Gallos Brook has become incapable of coping with the volume of ground / surface water originating from Heyford Park. Three issues arise from the inability of Gallos Brook to cope with the volume of water: 1. The B4030 becomes flooded just west of the Horse and Groom PH 2. Flooding of properties in Caulcott and 3. Infiltration of the excess ground / surface water into the foul sewage system in Caulcott to the extent that the system cannot cope with the volumes and 'fountains of effluent' emanate from the foul water sewer manhole covers in South Street, Caulcott creating a river of effluent which flows down the street. Until adequate measures have been put in place to deal with this issue, no further development should be permitted on Heyford Park."/>
