Comments	<input type="text" value="This is an additional objection to this application. The applicants have commissioned a report from consultants which purports to show how little noise this track creates. I completely disagree -and I think most people will when they see the attached Youtube video. It was taken on December 6, 2020, when an outside club - Coventry - hired the track out for a practice day. It was shot by the official photographer for the event. December 6 also happened to be the day when the applicants' acoustics consultants were supposedly taking readings of sound levels and they don't seem to have picked up very much noise. As you will see from this video, the official cameraman did. Roger Corke"/>
