Comments	<input type="text" value="I object. Not on the basis of it being an inconvenience but on the grounds of it being an environmentally detrimental project which will only see the destruction of habitats and loss of biodiversity in the area. At a time where we are trying to protect our planet, I question why anyone would consider allowing a project which threatens local wildlife by destroying niches and polluting a once thriving natural ecosystem. Allowing this land degradation which will exacerbate soil erosion and loss of land fertility will only accelerate the problems of local farmers and wildlife in the surrounding area. Furthermore, the fuel burnt by these vehicles will degrade the local quality of air and may even pose a risk to those who live in Hornton with pre-existing breathing conditions. Instead of removing vegetation and trees enhancing carbon dioxide emissions and climate change, we should be setting up afforestation projects as it is vital to be taking into consideration the health of the ecosystems that surround our village. I ask that you please consider all of these risks and put the needs and futures of the local people and wildlife before the temporary actions of those who will not suffer the consequences."/>
