For several years I have recorded the noise levels on a hand held noise meter. On the weekend of September 19/20th 2020 there was a Kart meeting a Shenington, but due to the NE wind no noise could be heard from the Kart circuit , however the noise from the Motorcross circuit was clearly audible in our garden ,our house is located on the west side of Shenington. On the Sunday morning out of interest at approx 11.00am, I decided to check the Noise levels at Alkerton barn crossroads, the readings were 50-53 db. I then went to the Indian Queen car park where I recorded 60+ db. The weather was dry with a NE wind of about 13mph (Met office site for Brook cottage) with higher gusts . Similar noise levels generated by the Motorcross were also observed at our property in October 2020 when there were again N/E winds. I read with interest the " w="" wind="" with="" would="" yours=""/>
