Comments	<input type="text" value="Jim Guest has made an frankly insulting and offensive submission in respect to this application. As a person in public office and custodian of the environment on our behalf I do not expect this watered down inaccurate kind of informal reporting. To suggest that a practice day is anything akin to a race day with 4x4 quad bikes, adult races of 40 plus is absurd. I would like to formally request to see details published here please of the dates and exact locations of all noise measurements he says have been made: 1.To be sure all physical levels of the village were measured throughout the weekends 2. Details of the times measurements were taken and the corresponding race start and finish times on those days 3. Details of the weather, cloud cover, atmospheric pressure and wind direction at each measurement point and at the track 4. Benchmarks comparison measurement taken on days when there was no racing taking place. Thank you"/>
