Comments	<input type="text" value="We continue to oppose this application. Consideration of proposed uses, design and the density of the development are all significant issues but addressing the many understandable concerns on these matters misses the point. This proposal should be refused on Highway and traffic grounds alone for the numerous reasons already rehearsed by other objectors. In view of their overwhelming significance we can only draw our own conclusions as to why once again we have been unable to locate any comments from the Highway Authority by the closing date for comments."/>
