Comments	Having been resident in Stratton Audley for near on 18 years I object to this planning application I am becoming very concerned that Stratton Audley is being greatly impacted by the Bicester Heritage group of companies that already operate on the site. Each day now I see and hear increased traffic on both the Launton & Bicester Roads from individuals and companies associated with the former RAF site including cars and motor bikes, low flying aircraft and microlight's with flight passes across the village Working from home has become more difficult due to the road and air noise particularly on the Launton Road side of the village with increased traffic levels making it almost impossible to enjoy our private garden spaces in peace! Vintage aircraft and motor vehicles are extremely noisy and polluting! There are daily passes from piston aircraft and incidents of historic cars and bikes accelerating on the Launton Road causing noise and danger to other road user's which includes horse riders and dog walkers Volumes of litter have also notable increased There is absolutely no doubt that any future development will impact our beautiful village environment and cause great loss to the local wildlife habitat, hedgerows birds and mammals This is unacceptable and detrimental to both current and future residents Stratton has always been a sort after place to live but this application if successful will likely change that The noise, air pollution and any additional light pollution will inevitably impact all The planning application needs to consider the residents more and include measures for road calming, new signing and speed restrictions to help protect the environment and Stratton village for future generations to enjoy I ask that you please take notice of these concerns
