Since it has socalled been called Bicester heritage we get more noise now than ever before, with cars engines reving weels spinning and low flying planes. This is not just on the odd occasions. I would like to know where they get the perimion to do this. They got rid of the gliders, and now have other plains that make noise how's this better. The cars some day or on the go practicing even when there is nothing on. The last thing you need is all this is going on is rediculas as specialy when it's a nice day in the garden or if you are working late and still in bed. There are other problems with people parking, I have on other occasions been over and had words with the person on the gate about people parking anywhere but all you get is there's nothing they can do. This is absolutely rubbish as Bicester Village has put up signs and putrols, so why cant they as it's the same company that do the signs and patrols. Since Bicester Village and this so called heritage centre has come to Bicester it's has made Bicester worse and I would like to know who's giving all these permtion as they are just doing wat they like when they like. Bicester Village is a nether thing.
