Comments	<input type="text" value="The current level of noise from the tracks on an infrequent basis, makes working from home awful. I have had to cancel meetings and calls due to the existing level. To increase the frequency and number of tracks will significantly increase the noise pollution, reduce property price and make working from home unbearable. I have young children who still nap during the day, this will affect their ability to. This significantly impacts those who live on caversfield and other areas of Bicester near by."/>
