Comments	<input type="text" value="I fully support this application. With all the development that has or is scheduled to take place in Bicester there needs to be an adequate provision of primary healthcare facilities. The location at Graven Hill is ideal as it will still enable a reasonable level of local access from nearby communities in Ambrosden and Langford Village and the future community at Wretchwick Green. There are strong transport links to Graven Hill from other areas of Bicester through road, cycle and foot with existing public transport connectivity in place at present and the facility for this to be enhanced. However, strong consideration must be given to ensuring ease of access for patients across Bicester going forward. Parking seems adequate for the level of staff and patients predicted. I've no issues with the design of the facility apart from noting that the BREAAAM rating could be improved and be more ambitious."/>
