Comments	<input type="text" value="I am Objecting again to this application - because it has still not actually addressed several critical points raised previously regarding: traffic level impact (e.g. not modelling correctly, and completely ignoring Elmsbrook's traffic survey data!); building non-zero carbon homes and re the heating network. Firethorn should not be allowed to violate the Bicester Eco Town Design Principle regarding building Zero Carbon homes - just to make the enormous arbitrary profit they desire; in any case, their calculations for predicting sales/costs/profit are flawed! This would open the door for the rest of NW Bicester to do the same, and then we don't have an Eco Town. I am also concerned at the lack of evidence that the traffic impact would be small enough for the roads to cope; and the lack of details regarding the impact on the District Heating System. Please don't allow this application to go further until all these are resolved."/>
