Comments	<input type="text" value="As a resident of the current Exemplar phase, I have recently reviewed the Financial Viability Assessment for the Firethorn Development Estate and the comments from the local residents' group. I would like to echo their concerns that the current District Heating system is not being adopted by the Firethorn development. This has the potential to undermine the long-term financial sustainability of this system, which was always designed to supply the planned larger development. The existing combination of good insulation, efficient district heating and roof mounted solar panels should be extended across the future phases of the Eco development as originally planned."/>
