Comments	<input type="text" value="I wish to object to this application, why a fuel station with the land contamination it brings when the Government want to phase out petrol and diesel. Why more fast food outlets when supposed to be considering healthy life styles not to mention the litter. That junction Already a nightmare with traffic volumes and pollution issues on Hennef way. There is no need for more services as Cherwell valley and Warwick are close by and why put services on the edge of a town when the town already provides all those things. The approach to Banbury is now soulless with rows of ugly sheds on what used to be attractive farmland. Is there an ambition for anything other than bringing in lower pay jobs? This will further erode the important gap between Banbury and nearby villages. This will encourage more car use I cannot imagine that workers on this site will use public transport, on previously, now developed green field sites, has there been a massive increase on public transport to get there or has car usage gone up. Banbury should make the most of regenerating existing sites rather than constantly using open countryside."/>
