

# Comment for planning application 21/02584/LB

<b>Application Number</b>	<input type="text" value="21/02584/LB"/>
<b>Location</b>	<input type="text" value="The Lion Main Street Wendlebury OX25 2PW"/>
<b>Proposal</b>	<input type="text" value="Variation of Condition 4 (removal of existing kitchen extract unit within 6 months) of 20/02816/LB – To extend the time limit for completion to mid-November 2021"/>
<b>Case Officer</b>	<input type="text" value="Gemma Magnuson"/>
<b>Organisation Name</b>	<input type="text" value="Mani"/>
<b>Address</b>	<input type="text" value="Concord,Main Street,Wendlebury,Bicester,OX25 2PJ"/>
<b>Type of Comment</b>	<input type="text" value="Comment"/>
<b>Type</b>	<input type="text" value="neighbour"/>
<b>Comments</b>	<input type="text" value="It should be noted again and subsequently addressed moving forward that we should have been categorized as an immediate neighbour and consulted in relation to any planning applications made by The Lion. This has been highlighted to Cherwell District Council during many years of communications relating to this matter. Some of the consulted properties are completely shielded from the kitchen extension albeit we cannot comment on the impact on those we however are fully exposed much like a number of other neighbours not included on this list. We feel incredibly let down as this matter continues to drag on and for far too many years. This should have been addressed long before Covid and all parties should know this. The noise and smell continues to cause great distress and affects our daily life, we have been unable to make full use of our property for far too long, our garden is unusable and the noise and smell even impacts when our doors and windows are closed. Our concern is that an extension application will lead onto another especially as the best time of year for completing such works is ending. We respectfully request the planning officer ensure that this matter is addressed and delivered upon within the proposed extension application by mid-November 2021. We still have concerns the proposed works will not fully resolve this matter and this option was clearly the most cost effective and less impactful for discharge and ventilation."/>
