Comments	<input type="text" value="With regard to the above proposals I have few concerns on ecological grounds. The submitted bat report found that bats and nesting birds are not an issue in the demolition of the existing building. I would recommend however that in line with policy to seek an overall gain for biodiversity from all development that the new building includes a couple of measures for increasing opportunities wildlife such as bat boxes or bat tiles. A biodiversity enhancement scheme could therefore be conditioned. There is a document showing a proposed type of light. As regards the impact on nocturnal wildlife a lighting strategy should be produced that outlines where, when and how often they envisage the exterior of the site to be lit. Kind regards Charlotte"/>
