| Type of Comment | <input type="text" value="Objection"/> |
| Type | <input type="text" value="neighbour"/> |
| Comments | <input type="text" value="Howes Lane and the surrounding area has become unbearable. My house backs onto the road, the constant traffic noise makes it hard to have a conversation in the garden let alone the impact on my families health and well-being. The new proposals will just add to this, firstly the extra lorries which btw struggle to get round to go under the iron bridge (there will be a major accident there soon), secondly the extra traffic going to the site daily. Adding to this will be the extra light pollution, the warehouse that are currently built are bad enough. The original proposal which was shared with the local residents included the realignment of Howes lanes to support the new estates traffic, there was also meant to be housing to support growth which was also a reason given for the warehouses being built where they were (population growth needs supporting work areas close by), what's happening Ned to this?. I don't support extra warehousing especially the ones close to the road which are near to residents housing and I also believe no more building should be done until Howes Lane is realigned to help support traffic. The area can't support the growth without the infrastructure and then people to work there (housing)."/> |
