Comments	<input type="text" value="Without significant improvements in the road infrastructure, additional warehouses in this area will have a significant impact on noise and air pollution in the nearby residential areas. Howes Lane is already extremely busy and the realignment that would complete the Bicester ring road needs to be completed before any additional construction takes place. As an allegedly garden town, measures need to be put in place to improve air quality and to develop additional green spaces rather than additional developments such as this that attract further heavy good vehicles to a primarily residential area"/>
