Comments	<input type="text" value="I object to this proposal on the following points: 1. At this point Main Street is a no-through, narrow, single-track lane with a near right-angled bend and nowhere for vehicles to turn. It ends in a bridleway/footpath, which is private property. 2. Both the annexe and the carport plans will raise the height of these buildings which would be excessively intrusive to the neighbouring properties and change the character of the area along this lane; which at present is a rural lane leading to a footpath/bridleway across agricultural land. The roof height of both these buildings should be restricted to that of the adjacent garage. 3. f these plans were to be approved the resulting building work would cause major access problems for the residents along this part of the lane and bridleway as there is no other vehicular access to their properties."/>
