<b>Comments</b>	<input type="text" value="Stoke Woods is an ancient woodland containing a mix of native broadleaf and exotic conifers, carpets of bluebell in the spring and a variety of bird and butterfly species. With several open glades and a small meadow, it provides important habitats for invertebrates and its prominent position on an otherwise flat landscape makes it a landmark that can be seen for miles around. The construction of warehouses adjacent to the woods will destroy this."/>
