Comments	<input type="text" value="This will add additional heavy traffic to existing roads that already are damaged and ill equipped to deal with the existing traffic. It will take away a much used public place Stoke Lyne Woods which is home to very old trees and wildlife that should be conserved and protected - for eg red kites and kingfishers. Heavy traffic will pollute and also damage local listed buildings in the nearby villages which have stood undisturbed for hundreds of years and should be preserved. The cluster of villages affected already have motorways and A roads surrounding them, now HS2 and this would serve to ruin a historic cluster of villages. They are of national/international interest and the subject of a book and tv programmes - Lark Rise to Candleford and should be preserved. There will undoubtedly be heavy traffic going through these villages due to insufficient roads/excessive traffic on already busy country roads."/>
