POST ROOM

Dear Sir/Madam

I write to express my very strong objection to the proposed building of warehouses at the junction of the M40 at Baynards Green.

I am a third generation resident of the village of Aynho and over my lifetime the amount of traffic passing through this lovely village has increased considerably. This I understand and accept as every household now owns one or more vehicles.

As the business side of traffic increased the M40 Motorway was built and it was thought this would decrease our traffic volume. BUT NO...

During the past 3 years business vehicles have increased not only in volume but in size, making it now almost impossible for pedestrians to cross the road and for two vehicles to pass each other, not to mention the danger on pavements and vehicle fumes.

These warehouses will obviously increase that volume to such an extent that the whole of our village main road will be unbearable and considerably dangerous not only to vehicles, but also to people and property.

If these buildings are necessary please let them be placed next to the towns they are going to serve, not spoil our lovely countryside with more noise and pollution.

Yours faithfully

S.A. Stevens (Mrs)
