Comments	<input type="text" value="I wish to object to the proposed erection of the 5g mast in the proposed site. 1. The mast would be in the conservation area, the village has already turned down the prospect of st lighting because of the change it would bring to a beautiful village. A mast would be similar to a lamppost except much larger and an eyesore. 2. If we have to have a mast could it not be sited in a less obtrusive place where no one would see it from their property, i.e. In the vicinity of the quarry or even the village hall where no one would see it unless visiting the sites. Perhaps somewhere on the golf course? 3. The mast if situated in the current place suggested would be directly in full view of my cottage one of the oldest in the village."/>
