Comments	<input type="text" value="With the development within the area , 5G is essential, there are no health reasons, as WHO have stated ... Many people already rely on the mobile phone network, as the only way to get internet services, 5G will become far more utilized as the infrastructure of the technology expands, The area suggested is good for all the community , and will be beneficial to others within the area. The quicker this can be installed the better, it can't come soon enough."/>
