

Comment for planning application 21/03350/TEL

Application Number	<input type="text" value="21/03350/TEL"/>
Location	<input type="text" value="Street Record Station Road Kirtlington"/>
Proposal	<input type="text" value="Proposed 5G Telecommunications Installation"/>
Case Officer	<input type="text" value="John Cosgrove"/>
Organisation Name	<input type="text" value="Daniella Timms"/>
Address	<input type="text" value="Littlehaven, Troy Lane, Kirtlington, Kidlington, OX5 3HA"/>
Type of Comment	<input type="text" value="Objection"/>
Type	<input type="text" value="neighbour"/>
Comments	<input type="text" value="Our beautiful village has perfectly adequate 4G network coverage and does not need 5G. Not only is the mast an absolute eye sore which will ruin the natural beauty of the village but there is also the impact it may have on our health. Thousands of studies link low-level wireless radio frequency radiation exposures to a long list of adverse biological effects, including: DNA single and double strand breaks oxidative damage disruption of cell metabolism increased blood brain barrier permeability melatonin reduction disruption to brain glucose metabolism generation of stress proteins Let's not also forget that in 2011 the World Health Organization (WHO) classified radio frequency radiation as a possible 2B carcinogen. More recently the \$25 million National Toxicology Program concluded that radio frequency radiation of the type currently used by cell phones can cause cancer. There has simply not been enough long term research into this. Please stop gambling with our health when we have a perfectly adequate network coverage already."/>
