Comments	<input type="text" value="Location and visual impact on nearby properties: - why select this particular spot to erect such an alien dominating mast, so very close to residential properties, among which are some of the most ancient in this historic village? At 15m it would dwarf all the surrounding features. - how can a site within the conservation area boundary of the village be an acceptable proposition? - whatever the need for this mast there must surely be other places on the outskirts of the village where it would not have such a dominating impact on any nearby properties."/>
