Dear Sirs

21/03452/TELSG
re: Planning Applications 21/03350/TEL

I should like to object most strongly to the planned application for a 15 metre mast & metal apparatus being installed just to the left of my drive.

It would be an enormous & completely out of place construction in a very prominent site, and, as I believe this is a conservation area, it could not be a less suitable position.

Traffic coming through Kirtlington on the A4095 would approach this Moustursty head on, as the road bends sharply to the right in the direction of Woodstock or sharply to the left onto the Bletchington Road.

At present the view is a pleasant, recently repaired, cold stone wall, with a view across the fields behind it.

A "mowpole and surrounding equipment" will hardly enhance this view.

I understand that there are also health issues from radiation. I am worried about this.

Yours faithfully,
