

Willow Tree Barn

Kirtlington

Oxon

OX5 3EZ.

Dear Sirs,

Ref. No. 21/03350/TEL

I wish to object to the above application on several points: -

1. As the proposed mast is within feet of my property I would have expected to have received notification of this proposal. The only way people living in the village have become aware of the application was by face book and word of mouth.
2. The 15 metres high mast plus its top apparatus and the box on the ground will be an eye-sore to the villagers living close by and people using the road through the village when they are used to a green verge and cowsold stone wall.
3. I am concerned about the possibility of radiation affecting not only myself and my neighbours but also the school children who use the pathway to school.
4. I am not objecting to 5G in the village it is the proposed site in the conservation area that is the problem.

Surely there is a site that would be acceptable that is not in the conservation area?

Yours sincerely
