Case Officer	John Cosgrove
Organisation Name	Amanda Kelly
Address	1 South End Cottages,Bletchingdon Road,Kirtlington,Kidlington,OX5 3HF
Type of Comment	Objection
Type	neighbour
Comments	<p>I would like to put forward my objection to this proposed 5g mast in the village of Kirtlington. I understand that we need technology but not to the detriment of rural areas. It is not like we need google maps wandering around the village trying to find the nearest restaurant! The 50 ft 5g mast is not something that is in keeping with village environment and should be located further away from housing. The mast is large and intrusive and would be an eyesore to anyone entering and leaving the village. I understand moving the mast further away from housing may be at an extra cost to the telecommunication company, but I am sure they will make a lot of money from their mast and recuperate their initial layout! My points of objection are as follows. It is located within the Kirtlington conservation area. A conservation area is an area with special architectural or historical interest. A 5g mast would certainly not fit in here. It will be visible from housing located in the conservation area. As conservation area residents we go to a lot of expense to keep our houses looking a certain way with strict conditions to adhere to. It would make a mockery of the conservation system if this was allowed to go ahead in this historical village. It is far too close to residential housing (which I notice is why the applicant has turned down various other locations within the village). For a lot of houses, it will be the first thing seen when opening bedroom windows. I am not sure if there is lighting on the mast, but I am guessing there will be. The village does not have street lighting in this area, or most of the village for that matter. The application says that it will blend in with street furniture? What street furniture? One very old small wooden post? The health impacts of are unknown of a mast like this in close proximity to housing. Disturbance from pulsing waves of the antenna for those residents nearest to it. I find it odd that we have notices all around the village for someone needing to cut down a tree or have patio doors fitted in their property. Yet we get NO notification for a 50ft 5g mast. It is astounding! I implore the council to reject this application on the above grounds. So many residents will be affected by this. A lot of whom have not been informed or notified by the council.</p>
