Comments	<input type="text" value="The landscape of the Bicester area has changed immeasurably over the last few decades. Some has been well considered, much of it not. The loss of green field land is shocking. One element that has been a governing principle is the preservation of land grab between Bicester and the surrounding villages. This development utterly shreds that concept, one that has been accepted by virtually all. The utter carnage its development will cause to residents during build is appalling, as is the terrible addition to traffic once built. This is in addition to environmental ruin that it will deliver, the drain on water resource, the flood damage it will create and the enormous detrimental impact on all nearby residents. The complete abandonment of the concerns of residents over recent years is hugely damaging to the democratic process. For once just listen to people."/>
