

## Results

Presentation of Results		
Item No.	Item Checked	RAG 1
10.0	Are the final results presented in a table of peak flows and plots of hydrographs?	OK
10.1	Do the results include any other important information for the next stage of the study?	OK
10.2	Has all information been presented in figures and tables appropriately?	OK

Checks on Approach and Results		
Item No.	Item Checked	RAG 1
11.0	Have the design flows been checked for spatial consistency, e.g. at confluences and along reaches?	N/A
11.1	Have the design flows been checked against flood peaks in the gauged record, and any longer-term flood history?	N/A
11.2	Have the 1% and 0.1% AEP growth factors been derived and sense-checked? If the 1% AEP growth factors are outside the typical range, has a justification been provided?	OK
11.3	Have the results been compared with any from other studies and justification given for any differences?	OK

Assumptions, Limitations and Uncertainty		
Item No.	Item Checked	RAG 1
12.0	Are the assumptions and limitations of the methods acknowledged? Are the assumptions listed specific to this study?	OK
12.1	Does the report comment on uncertainty in the design flows?	Green

Again, this would default to the uncertainty assessment associated with the EA approved 2014 flows as these are higher than those calculated. Again demonstrating a conservative approach.
