| Comments           | <p>This plan will see the destruction of green belt land that will drastically impact the surrounding villages and countryside. As well as being an eyesore, this development will see the noise level rise in the local area; it will increase pollution and there will be an increase in traffic. All these factors will of course impact local people and wildlife negatively. This section of road is already a disaster that can't cope with the current level of traffic, let alone an increase. This will surely encourage more cars to travel along the small country roads and pass through once quiet villages- This in turn will make it difficult for people living locally to travel and to go about their daily lives. I would also like to point out that this land practically backs on to Stoke Lyne woods- a beautiful ancient woodland that is enjoyed by many and that is the home to a multitude of species of plants and creatures. I'm saddened on a daily basis to see how quickly the countryside in my local area is being decimated. Countryside that was once farmed by my ancestors. What are we leaving our children? It's an utter disgrace.</p> |
