Comments	I object to this planning application as it is really inappropriate for the area, which already has other such developments within a small radius. The application provides nothing for the area. The green fields the applicants describe as low ecological value are the regular feeding grounds for owls and other such animals. Every green field covered by development destroys the wildlife around it. This is not in the council plan for The Bicester area which has already been put under tremendous pressure of development. The extra light pollution will affect the ecology for miles around and also the whole character of the area. The extra traffic from people having to drive in to fulfill the jobs and building work will make the already busy road congested. This whole development seems an unnecessary, destructive and unneeded plan of development for no good reason at all.
