Comments	I currently work in office premises just the roundabout up from the planned building's/warehouses and have to object to this application. Unfortunately the roads and roundabout that this will impact is my daily commute into the office, of which is already as highly busy and dangerous road and roundabout (numerous accidents and crashes on both the road and roundabout over the last few years). More so the traffic build up is already highly significant and the introduction of depots and building work will only increase this to the point that it may make it impossible to get into the office without hours spent in the car. The level of traffic already means the roundabout and road is already dangerous to pull out onto due to the speed of oncoming traffic and number of lorries. Increasing this will not only be detrimental to local businesses but also to the environment.
