Subject: Objection Tritex Symmetry Park planning app 22/01340
I am writing to object to the planning application for Tritex Symmetry Park.

Several reason:

Paramount to keep green areas as Bicester is gradually swallowing up more than its fair share of the countryside - this would both be unsightly and environmentally unfriendly. This is also the gateway to Cotswolds and many beautiful part Uk - preserve these areas, we should be utilising all farm land especially in current economic climate and issue of importing food products.

The traffic congestion is already a huge issue at peaks times at this junction and very hard for cars from B4100 to get onto the roundabout and causing long tailbacks already there is not capacity for more traffic

It is already very dangerous junction as it becomes harder for B4100 traffic to join the roundabout

This would have a major impact on traffic flow on A43, M40 and B4100 causing further pollution with less green space to counteract the pollution..

Why once again are councils/government trying to ruin a beautiful countryside there are so many of these parks already going up all of the country and no doubt half not used and many old buildings laying empty - as with all these things so little planning and understanding of overall picture of UK storage capacity easy solution to do new builds rather than repurposing empty sites- LOOK AFTER THE ENVIRONMENT

Best wishes
