<b>Comments</b>	<p>The proposals are in the main supportable. However, the change of material has some issues. The design and access statement does not actually support the use of only limestone. However, the proposal to use a mix would be appropriate for the location. The design statement states that would be acceptable alternative to the using just the limestone.</p> <p>If the agent is prepared to change the proposal to a mix of ironstone and limestone then a recommendation of approval can be given from a built heritage perspective.</p>
