Subject: Noke Solar Farm

Dear Sir

As residents of Oddington we would like to re iterate the objections of our Parish Meeting to the Noke solar farm.

Our house is one of several in our village with solar panels installed. We also have an air source heat pump and high levels of insulation. We support green energy and have taken steps to be sustainable.

We believe that the Solar Farm is unsuitable for this site and is NOT the way forward to tackling climate change. We strongly object to the siting of this project.

Yours Faithfully

Annee Leveson Gower
