Comments	<input type="text" value="I am for solar farms in general but feel this is a extremely poor location choice. In a high value farming, and biodiversity area, which are extremely rare in Oxfordshire. The impact on the nature reserve will be significant. There are lots of other better suited green and brown field locations for this type of development and these kind of developments in this kind of location should only be last resorts. We don't even have new housing developments in Oxfordshire with solar roofing mandated, which would more than make up for this location."/>
