Comments	<input type="text" value="I strongly object to the siting of this solar farm so close to the Otmoor Bird Reserve on the grounds that it will risk the death or injury of birds, especially birds that migrate. Unfortunately solar panels have reflective properties similar to open water. Migrant birds who habitually come to Otmoor Bird Reserve are likely to see a solar farm so close to their usual landing site as open water and when coming in to land can be killed or injured and confused. We need to protect the birds not cause them harm."/>
