Dear Rebekah

Following on from my previous email containing my objection, I'd just like to amend the last sentence of my last comment to add that it would be a number (and not all obviously) of those that do (support the application of the proposed solar farm in Noke that) would not be personally affected by them apart from in terms of profit.

Kind regards
(Digby Cottage, Noke)

Dear Rebekah

Ref:

22/01682/F - Development of a ground mounted solar farm incorporating the installation of solar PV panels, associated infrastructure and access, as well as landscape planting and designated ecological enhancement areas At: Land North of Manor Farm, Noke

I would like to strongly object to this development. If this solar farm were to go ahead it would be completely destructive to this particular environment, the well-being of both the rare species present here as well as the inhabitants of the area. Such a development would be an absolute travesty and I feel it would be a major gain for ruthless profiteering without due consideration of the actual precious and invaluable nature of the environment. It would be a complete industrial invasion of an important natural environment and it is clear that the majority of the inhabitants do not support the plans and those that do would not be personally affected by them apart from in terms of profit.

Thank you very much for your consideration in this matter.

Kind regards
