Hi Katherine,

I don't believe arboriculture was consulted on the above application however, I'm involved in the site as the site owner has been requesting the TPO covering a walnut to the south border of the site be revoked.

With this in mind, as there is a TPO on the site, along with several trees bordering properties to the south, I'd suggest an arboricultural report including impact assessment and method statement to BS5837:2012 should be submitted for review in order to ensure the retention of key trees within the site.

Kind regards,

Iain Osenton
