

**01** Standing at the south end of the manege looking north. The house can be seen in the distance beyond the manege fence. The proposed tennis court, changing hut and swimming pool would be built in the immediate foreground.

**02** Standing at the north end of the manege looking south towards where the pool, changing hut and tennis court would be built in the immediate foreground. The hedge screening can be seen beyond the manege fencing.

**03** Standing within the manege looking at the 2 metre high fence along the east boundary. This fence would match the height of the proposed tennis fencing (see Figure 3).

**04** Standing just outside the manege looking at the fencing along the east side. This fencing would fully screen the proposed tennis court, changing hut and swimming pool within the manege.
