Comments	<input type="text" value="Deddington Health Centre covers patient registrations from the area proposed and continues to be under increasing pressure to accommodate the increasing population requiring Primary Care Services in the area. We do not have enough of either operational or clinical space for providing healthcare and we cannot accommodate any further growth without significant investment in premises. Deddington Health Centre has accommodated patient numbers almost doubling since it was built and has undergone several refurbishments to utilise every possible space, further space is not available on the current footprint. We have recently had to close our list to new patients although due to NHS England demand we have had to re-open despite nothing changing in our resources. Any further increases in our patient numbers places significant risk on our ability to deliver services to our current patient population. For these reasons we must object to this planning proposal, continued development without significant investment in Primary Care estates is impacting on an already fragile primary care service and this places greater pressure on current patients and our employees."/>
