Comments	<input type="text" value="I used to live in a neighbouring village, and I am pleased to support this modern project.

I appreciate that some people will try to make a case against this development, but I feel that the positives of this project by far out number any negatives that people may think of (ie that it is in the wrong location).

I feel that this project has the capacity to:-
- make a significant contribution towards net zero
- make a real contribution towards managing wholesale electricity prices (a very real issue for millions of people who struggle to pay their bills)
- bring many biodiversity benefits"/>
