

Comment for planning application 22/03873/F

Application Number	<input type="text" value="22/03873/F"/>
Location	<input type="text" value="Land North And Adjacent To Mill Lane Stratton Audley"/>
Proposal	<input type="text" value="Installation and operation of a renewable energy generating station comprising ground-mounted photovoltaic solar arrays and battery-based electricity storage containers together with a switchgear container, inverter/transformer units, Site access, internal access tracks, security measures, access gates, other ancillary infrastructure and landscaping and biodiversity enhancements."/>
Case Officer	<input type="text" value="Rebekah Morgan"/>
Organisation Name	<input type="text" value="Carolyn Goss"/>
Address	<input type="text" value="Elm Farm, Mill Road, Stratton Audley, Bicester, OX27 9BJ"/>
Type of Comment	<input type="text" value="Objection"/>
Type	<input type="text" value="neighbour"/>
Comments	<input type="text" value="My reasons for objecting to this application is that it firstly covers such a vast area of productive farmland, even if it is lower grade it still can produce lower grade grain. Solar panels on this scale in this environment can be an eyesore for those close to or passing it and for 40 years! Can not these panels be installed on new factories being built all around the Bicester area. In France new factory buildings have solar on their roofs why not here? These factories will have at least a 40 year life span, maybe more and the panel will be part of the construction.
It seems economic reasons are given for the size of this solar area given the cost of cabling, can not a brownfield or less productive site be found nearer to the Bicester depot which could then be of a smaller construction?"/>
