<b>Comments</b>	<input type="text" value="I would like to object strongly to the planning application for Solar Panels on land to the north of Stratton Audley. Land, that has been used for generations for farming and producing food. Land that has been purchased by someone outside of the parish, who has bought it for their own financial gain, with no concern for the local community or wildlife. The land was recently purchased and planning was approved for building a new barn, to support the land as arable production. Why then is the planning now being sought for solar panels? Because of greed, and a better offer for the owner. If you allow this application to go through, then you will allow a precedent and our future generations will go hungry. The land neighbours Pool Farm, where the Wigmore family have worked really hard to build a successful wedding and events business for over 25 years. How can someone be allowed to damage their business by building a solar farm next door, without even living there? I know we need the energy but please go and install solar panels on all the warehouses and buildings being built around Bicester. I really hope that the council will see sense and reject these plans. We need to have a council that protects the countryside, which is already being ruined by HS2 and the Cambridge/Oxford railway line."/>
