Comments	<input type="text" value="I'm raising my objections due to a number of factors.

This will have a major impact on the the landscape which has already been negatively impacted by HS2 and East West Rail locally and blighted local communities.

We are currently suffering with increased food costs and empty shelf's in the shops. Is this a good use of productive farm land?

What is the long term plan for the site, is there going to be a cap proposed by the local council? To stop solar farm growing? As it will become easy to add to when the infrastructure back to grid is installed?

Thank you
