Environmental Protection has the following response to this application as presented:

Noise:

Having read the CTMP provided by the applicant I would like the hours of construction to be amended to match those published by the council for noisy works:

Monday to Friday - 7:30am to 6:00pm

Saturday - 8:00am to 12:30pm

Sunday - No noisy work

Public / Bank Holidays - No noisy work

Contaminated Land:

As per the last response, based on the previous uses of the site we would like to see information that the site is not contaminated. Therefore I would advise the following conditions are placed on any permission granted:

No part of the development hereby permitted shall take place until a desk study and site walk over to identify all potential contaminative uses on site, and to inform the conceptual site model has been carried out by a competent person and in accordance with DEFRA and the Environment Agency's "Land Contamination Risk Management (LCRM)" and has been submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval that it is satisfied that no potential risk from contamination has been identified.

If a potential risk from contamination is identified as a result of the work carried out under condition [**], prior to the commencement of the development hereby permitted, a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and to inform the remediation strategy proposals shall be documented as a report undertaken by a competent person and in accordance with DEFRA and the Environment Agency's "Land Contamination Risk Management (LCRM)" and submitted to and approved in writing by the Local Planning Authority. No development shall take place unless the Local Planning Authority has given its written approval that it is satisfied that the risk from contamination has been adequately characterised as required by this condition.

If contamination is found by undertaking the work carried out under condition [**], prior to the commencement of the development hereby permitted, a scheme of remediation and/or monitoring to ensure the site is suitable for its proposed use shall be prepared by a competent person and in accordance with DEFRA and the Environment Agency's "Land Contamination Risk Management (LCRM)" and submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval of the scheme of remediation and/or monitoring required by this condition.

If remedial works have been identified in condition [**], the development shall not be occupied until the remedial works have been carried out in accordance with the scheme approved under condition [**]. A verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the Local Planning Authority.

Any contamination that is found during the course of construction of the approved development that was not previously identified shall be reported immediately to the local planning authority. Development on the part of the site affected shall be suspended and a risk assessment carried out and submitted to and approved in writing by the

local planning authority. Where unacceptable risks are found remediation and verification schemes shall be submitted to and approved in writing by the local planning authority. These approved schemes shall be carried out before the development [or relevant phase of development] is resumed or continued.

Air Quality:

EV charge points now come under the buildings regulations regime.

Odour: No comments

Light:

Prior to the first use of the development hereby approved details of the external [lighting/security lighting/floodlighting] including the design, position, orientation and any screening of the lighting shall be submitted to and approved in writing by the Local Planning Authority. Prior to the first use of the development hereby approved the lighting shall be installed and operated in accordance with the approved scheme at all times thereafter.

If you wish to deviate from the suggested conditions then this should be discussed with the officer making these comments to ensure the meaning of the condition remains and that the condition is enforceable and reasonable.

Please note my working pattern below, I will only respond on the days appropriate to the email content Mon – Weds: Environmental Protection, Thurs – Fri: Health Protection and Compliance

Kind Regards

Neil Whitton BSC, MCIEH
