Comments	<input type="text" value="Current proposed design would make journeys by foot or bike, which CDC is meant to be encouraging, more difficult. Especially for people with disabilities including on mobility scooters as I do not believe that the pedestrian refuges will be big enough. Traffic flow and control seems more than sufficient at this time and I do not see the need for these works, in fact the only impact from the proposed building works would be to create delays. I ask that this application is rejected and a new plan requested."/>
